EXTEND SAN FRANCISCO OR TENATIVE AGREEMENT

In this article we are bringing to the attention of our membership a question that we consider of vital importance to our Brotherhood and the Electrical Workers of North America.

The question relates to the secession movement and from information at hand, we believe an opportune time presents itself to bring into affiliation the greater portion of those Electrical Workers who still remain with the unaffiliated organization. The situation briefly stated is, we have received requests from several local unions and representatives of District Councils connected with the seceders asking if the terms of the San Francisco or what is known as the Tentative Agreement could be extended to them.

Of course our membership is familiar with the action of the Boston Convention relative to this matter. The convention withdrew from the International President and Executive Board the power of dealing with this matter after March 1st. Therefore your officials have not the privilege of extending the terms of the agreement further without the consent of our membership. We are compelled to inform those making the inquiries to this effect. We advised them however, that if a sufficient number expressed a desire to reaffiliate that we would submit the proposition to the Brotherhood for referendum action and recommend to our members that they give the matter favorable consideration.

Through the good offices of President Strief and Executive Board members, Brooks and Ribble of the Iowa State Federation of Labor, a conference was held in Des Moines, Iowa, on June 7th, our Brotherhood being represented by I. E. B. member, M. J. Boyle of the 5th District and President McNulty, District Council No. 6 of the 2nd District which is affiliated with the secession movement, by President Perrin and delegates from several local unions of that District Council. President James Fitzgerald of that secession movement, was also present.

It was brought out at this conference that when the Tentative Agreement was submitted for a vote of the members of the unaffiliated local unions the terms of the agreement were not made clear to them, they maintaining they did not understand the interpretation thereof.

At the meeting Mr. Fitzgerald made an attack upon President McNulty for not interpreting the San Francisco or Tentative Agreement; also tried to convince his associates that we had not lived up to the provisions of the agreement.

This charge requires no answer from us, as we respectfully refer anyone interested, to the officials of the Pacific District Council and the local unions who reaffiliated under the Tentative Agreement, as to whether or not we have kept faith with them.

As to Mr. Fitzgerald's charge that the I. P. did not send out an explanation or interpretation of the Tentative Agreement, we desire to state that the officials of the Pacific District Council and Vice-President Smith of the unaffiliated organization, sent out an interpretation of the agreement, and on account of the desperate efforts made by the General Officers of the secession Movement to discredit the proposition and distort the real intent of it, we consider it advisable to leave the explanation made by the District Council and President Smith stand, for fear of further confusing those who had the matter under consideration, for we well knew from past experience, Fitzgerald, etc., would try to convince their members that whatever we said meant something other than what we intended.
At the meeting in Des Moines we were requested to interpret the Tentative Agreement which we gladly did, and you will note that the interpretation is contained in about four paragraphs.

This short explanation or interpretation covers the agreement thoroughly, so much that when it was read to the representatives at the Des Moines meeting, it was adopted unanimously by them despite the protest of Mr. Fitzgerald. We are convinced that when the matter is submitted to a vote of the members of D. C. No. 6 that it will be adopted by an overwhelming majority.

We print following this article, the agreement and its interpretation, and earnestly urge all members to vote for the adoption of the request contained herein, and extend time of agreement up until September the 15th.

We realize that a great many of our members will criticise us for again suggesting this proposition, but we trust that those members will bear in mind that we are doing so upon request of the representatives of D. C. No. 6 of the 2nd District which is affiliated with the seceders, and other locals connected with the unaffiliated organization; also officers of the Iowa State Federation of Labor, and our members should bear in mind that if the bosses had a vote on the question, they would vote no and this in itself is the best possible argument why the members of the Brotherhood and those unaffiliated should vote in favor of it.

The agreement and explanatory interpretations are as follows:

June 7th, 1914.

Mr. R. E. Perrin, President District Council No. 6, 2nd District. Dear Sir and Brother:

On request of President Stribf and Executive Board Members G. H. Brooks, and W. J. Ribble of the Iowa State Federation of Labor, we the representatives of the Affiliated Brotherhood of Electrical Workers do hereby submit to you the following proposition for the consideration of the members of your organization. It being understood that this proposition must be submitted upon application of your District Council to a referendum vote of the Affiliated Brotherhood, which will be done with our recommendation, that same be concurred in.

First: That all local unions of the Unaffiliated Brotherhood of Electrical Workers now constituting the said brotherhood as local unions do join and become affiliated with the brotherhood of Electrical Workers, affiliated with the American Federation of Labor, said affiliation to commence on or before August 15, 1914. Per capita tax and the terms of affiliation to be as herein provided for, it being understood and agreed said terms expire September 15, 1914.

Second: That all local unions of the Unaffiliated Brotherhood join and become a part of the Affiliated I. B. E. W. by the payment of the current month per capita tax as per section No. 1, with the understanding that these local unions shall be required to pay the semi-annual death benefit assessment (50 cents), per Section No. 1 of Article No. 12 of the Affiliated I. B. E. W. constitution.
Third: That the members of all now unaffiliated, local unions so joining and becoming a part of the Affiliated I. B. E. W. shall be placed in good standing in the Affiliated I. B. E. W. and will be entitled to the benefit of such good standing equal with and to the present members of the Affiliated I. B. E. W., except the death benefit provided by the laws of the Affiliated I. B. E. W., provided however, that they (the members so joining and becoming a part of) shall have placed to their credit by the Affiliated Brotherhood (12) month's membership, in so far as said (12) months membership relates to the death benefits.

Fourth: The present system of District Councils of Electrical Workers covering the local unions of the Unaffiliated Electrical Workers in Iowa, Nebraska, North Dakota, South Dakota, Minnesota, and Wisconsin shall be continued by these local unions which join and become a part of the Affiliated I. B. E. W. and such District Council shall be continued until changed by the referendum vote, or by a general or special convention of the Affiliated I. B. E. W.

Fifth: That the International Office of the Affiliated I. B. E. W. shall expend the sum of 18 cents per member per month received from the local unions affiliated with the District Council No. 6 of the 2nd District as monthly per capita tax, within the territorial confines of the said District Council No. 6 of the 2nd District. Said sum to be expended for organizing purposes. The present salaried officers of District Council No. 6 of the 2nd District will be appointed organizers by the International President of the Affiliated Brotherhood, in so far as above mentioned funds make it possible, its members understood that the said officers are subject to the laws of the Affiliated Brotherhood governing organizers.

Sixth: That this conference earnestly recommends to all local unions of the Unaffiliated I. B. E. W. that they become a part of the affiliated I. B. E. W. at the time hereinbefore specified and as per the terms hereinbefore specified, and it is understood and agreed that wherever District Councils of Electrical Workers now exist consisting of local unions of the Unaffiliated Brotherhood, these Councils shall be maintained under the same conditions and stipulations as hereinbefore declared to be granted to the District Council No. 6 of the 2d District by the Affiliated I. B. E. W.

Seventh: It is understood and agreed that where there is more than one local union having jurisdiction over the same class of work in the same geographical jurisdiction they shall unite and become one local union to operate under the laws of the Affiliated Brotherhood and to be known by the number of either of the existing locals as they may mutually agree, provided, if the locals themselves can not agree under which number to unite, it shall be the duty of the International President of the Affiliated I. B. E. W. to designate said number. It shall be the duty of the local union, as mentioned in this clause, to select a committee of three from their respective local unions for the purpose of determining the personnel of the officers of the united local unions, and the designation of said officers shall be as near equally representing the two local unions as possible; provided, upon the failure of these representatives to agree it shall be the duty of the International President of the Affiliated I. B. E. W. to determine any disputed point, he always having in view the essential features of as nearly as possible naming and dividing the officers from the membership of the two locals.

Eighth: The following agreement is to go into effect immediately upon approval by the referendum vote of the Affiliated I. B. E. W. and by the referendum vote of the District Council No. 6 of the 2nd District, and shall remain in effect as the basis of affiliation and membership in the Affiliated I. B. E. W. of the now Unaffiliated I. B. E. W. until changed by a convention or by the referendum vote of the membership of the Affiliated Brotherhood, and it is understood that each respective side hereeto shall so notify the other as to the action of the above mentioned referendum vote, and future action shall be taken accordingly by all concerned.

Explanation: This proposition means that all members shall be placed in continuous good standing in the Affiliated Brotherhood upon the payment of the current monthly per capita tax which is 40 cents, and the payment of the semi-annual death assessment of 50 cents which is levied on all members of the Affiliated Brotherhood in the months of July and January of each year, and shall be entitled to deposit their traveling cards in any local union of the same branch of our trade and not be required to pass any examination or pay any difference in initiation fees. Provided, however, that such continuous good standing is at least five years in either organization or both. All members returning and entitled thereto by the official receipts of either organization will be given credit of twelve months' standing in regard to the death benefit so that should any member die one day after his per capita tax is received his heirs will receive the sum of $100.00. One year after affiliation his heirs will be entitled to $150.00, and an increase of $50.00 each year of continuous good standing until the maximum amount is reached which is $300.00 for five years. The local unions' official records and dupli-
cate receipts shall be the final proof of
a member’s good standing.

All members affiliated under this
proposition shall be accorded all rights
and privileges which the constitution of
the Affiliated Brotherhood provides for
its members, such as representation in
the Brotherhood conventions, of voting
on all questions local or international.

The present salaried officers shall be
continued in the interest of the District
Council No. 6 of the 2nd District, and
should any vacancies occur for any rea
son whatsoever, the same shall be filled
by the appointment of a member agree­
able to the District Council No. 6 of
the 2nd District.

All local unions now affiliated with
the District Council shall be required
to continue in affiliation therein until
the law is changed by the referendum
vote, or by a general or special conven­
ton of the Affiliated I. B. E. W.

We desire to make clear to all mem­
bers of the Unaffiliated organization that
it is our intention to keep both in letter
and in spirit all sections of this proposi­
tion, and will not at any time miscon­
true or misinterpret any part thereof
or resort to any subterfuge to deprive
any members, local unions, or District
Council of any rights accorded to them
by this proposition.

Respectfully submitted,
F. J. McNulty,
International President
I. B. E. W.
M. J. Boyle,
Executive Board Mem­
der 5th District I. B.
E. W.

SNUFFING OUT LIVES BY WHOLE­
SALE.

How fundamentally the service of the
underground workers is related to the
whole social structure is realized only
when the workers themselves compel
recognition by withholding that ser­
vice. The hardships, the peril, the
heartbreaking toll of the underground
work also is only appreciated when the
workers themselves compel the con­
sciousness of society—those grim facts are mangled bodies, torn flesh
and limbs, and their own life-blood.

Down in West Virginia two hundred
miners have given society human de­
monstrations of the peril of mines. So­
ciety gasped at the noise of the ex­
losion, shuddered at the smell of fresh
blood and flesh. So far only their emo­
tions have been aroused. How many
more demonstrations will be necessary
to move the consciences of men and to
convince them that civilized society can
not permit the operation of unsafe mines?

Men and women with a moral apprecia­
tion of the value of human life will
not dare to permit men to work in mines
that are known to be death-traps. Fur­
thermore, the society with this higher mo­
rality will feel the obligation of know­
ing whether or not conditions in mines
are safe.

Mine No. 5, operated by the New River
Collieries Company, at Eccles, West Vir­
ginia, had been officially reported as a
gaseous mine. Yet the miners were ex­
posed to its perils daily. Perhaps they
did not understand the danger, perhaps
familiarity made them callous, perhaps
compelling necessity forced them to ac­
cept the hazard. They had no way to
bring the story of the lives of coal-dig­
gers to the ears of society. Society was
to busy with other things to find out for
itself. Only some horrifying disaster at­
tracts its attention of the mines. Will
not the three explosions in that mine
have some effect upon the hearts of the
users of coal, that preventive measures
may be made more effective?

The reports of the federal Bureau of
Mines for 1913, give 2,785 as the total
number of men killed in and around the
mines during 1913, as compared with 2,360
for 1912. This represents an increase
of 425, or 18 per cent. The number of
mine disasters was reduced by 38 per
cent. The United States has the high­
est death rate of men killed in coal
mines of any great coal mining country,
which in itself is proof that the United
States is far behind those countries in its
care for the lives of those who dig in
our coal mines.

The federal Bureau of Mines has made
progress, but it is just beginning to dis­
close the immense field for effective
work awaiting its agents. Safety in­
quiries and investigations have not kept
pace with the appalling need for them.
Human lives have been held pitifully
cheap by mine operators.

The constant daily toll of the mines
consumes a few lives each day. Silently
they disappear and only those in the
home group know or care. The terrible
indifference of industry merely notes
these lives in the mine records.

But if we as people have hearts and
minds we will take notice of each miner
who loses his life in the underground
service to society. We will freely give
our national riches to prevent the
wastes and to eliminate the hazards from
that service. We will remove all ob­
structions that prevent the Bureau of
Mines from rendering the most effective
service. We will create a public senti­
ment that shall compel conformance with
the best methods for safeguarding the
lives of the miners.—American Federa­
tionist.
IN MEMORIAM

Whereas, The members of Local No. 41 of Buffalo, N. Y., are called to pay their last tribute to the memory of one of their worthy members, Jay T. Miller, who was accidentally killed May 20, 1914, by electric shock while employed in the canal zone, Panama.

Stricken down while still in the flower of useful, vigorous and glorious young manhood, his noble qualities, great unselfish character, kindly, generous, buoyant spirit, his light heart and deep affection will ever remain fresh in the memory of those who knew him best; therefore, be it

Resolved, That we extend to the bereaved parents and friends of our deceased brother our deepest sympathy and as a mark of our sorrow, our charter be draped for a period of thirty days, a copy of these resolutions be spread on the minutes of this Union, a copy sent to the family and a copy to the International Office for publication in our Official Journal.

E. W. Brown,
A. E. Simons,
Arthur Sebert,
Resolution Committee.

MEMORIAM.

Whereas, Almighty God in His infinite wisdom, has taken from our midst our esteemed Brother and co-worker, Bro. T. J. Watkins, and

Whereas, Brother Watkins was a true and loyal member of this Local Union, a staunch supporter of Unionism and an honest and faithful workman; therefore, be it

Resolved that this Local Union extend to his widow and relatives our heartfelt sympathy, that our charter be draped for thirty days, as a testimonial of respect and esteem for the deceased Brother; be it further

Resolved that a copy of these resolutions be sent to his family, a copy to the International Office for insertion in the Official Journal, and these resolutions spread on our minutes.

Resolutions Committee,
H. E. Scott,
W. B. Roberts,
A. B. Holmes.

MEMORIAM.

Whereas, Local Union No. 61, I. B. E. W., has been called upon to pay the last tribute of respect to the memory of one of its members, Brother Henry Jarret, who died May 20th, 1914, on the operating table before an anesthetic could be administered; and

Whereas, Local Union No. 61 has lost by his death a true and loyal Union man, and a Brother esteemed; therefore, be it

Resolved that the members of Local Union No. 61 extend their deepest sympathy to the family, relatives and friends in their hour of grief, and be it further

Resolved that our charter be draped in mourning for a period of thirty days and a copy of these resolutions be sent to the bereaved family and our Official Journal for publication.

Executive Board,
A. E. Danielson,
Secretary of Board.

All is not gold that glitters.
NOTICE.

On account of difficulty in our jurisdiction and having constitutional number of men unemployed, we are compelled to place in force Section 8 of Article 14 of our Constitution.

C. R. Wylie,
Secretary Local No. 146,
Decatur, Ill.

NOTICE.

Owing to difficulty in our jurisdiction and having constitutional number of men out of employment have placed in force Section 8 of Article 14 of our Constitution.

J. C. Brammer, Secretary,
Local No. 257, Lake Charles, La.

NOTICE.

Owing to difficulty in our jurisdiction and having constitutional number of men out of employment have placed in force Section 8 of Article 14 of our Constitution.

Local No. 52.

NOTICE.

All inside wiremen are requested to stay away from Seattle, Wash., as there are enough men now idle to take care of all the work to be found in this city within the next eighteen months.

The Chamber of Commerce of this city, the Employers' Association and the Transportation Companies are flooding
the east with newspaper statements and advertisements that the Northwest is a paradise for all Building Trades mechanics. Such statements do not come within a measurable distance of being half true. They are circulated with the intention of filling the city with idle men, who, through force of circumstances, would be willing to work for anything offered them.

Stay away from the entire Puget Sound country.

Further information gladly furnished by the Secretary.

G. W. Johnson,
Recording Secretary,
L. U. No. 46.

BOYCOTT CHILD LABOR OUT OF EXISTENCE.

No dividends, no profits can compensate for the waste and the wrong of child labor. The greatest thing that any nation has is its men and its women. No nation can be greater than the masses of its men and women. There is no more deadly certain way to undermine national power than to deny its children rights necessary to most complete development of heart, mind, and body.

Child labor denies these opportunities, not only to the individuals themselves but to their children and their children's children. The effect of the wrong and waste is cumulative, sapping the life-force of the nation.

Many industries in our country are soulless corporations as heartless as the "orgies" that were said to eat children. They have taken these little ones and have done their most to them. They have set dreary, tiresome tasks for little hands, they have permitted little feet to tread in dangerous places—all that they might have higher profits.

Statics of child labor, however appalling, are a most inadequate method of evaluating the incalculable—the effect of child labor upon human minds bodies, and ideals. Child labor robs children of a chance to grow, a chance to learn, and a chance to dream. It robs them of the chance to attain the fullest development of manhood and womanhood. It leaves them with a sense of the world's injustice burned into their inmost beings.

Children will become better citizens when the wrong of child labor is abolished. They will become healthier, more capable men and women when uninjured by premature overwork. They will become greater men and women when removed from associations that degrade and injure.

Child labor is not essential to any industry. An industry which can not be profitably conducted without using child labor is not necessary to society and is abhorrent to the social conscience. Men and women with hearts do not wish to encourage or to endorse in any degree those who profit by child labor. But often they are placed in the unfair position of giving seeming approval through patronage because they do not have access to information that will enable them to act in accordance with their sense of justice and their conviction of right.

It is due to those who earnestly desire the welfare of the nation's children that they should have the opportunity to help in the conservation and protection of the children.

It is a most solemn obligation due the children that all organizations for human welfare should use every available agency to promote humanity's progress.

There fore, we, the Executive Council of the American Federation of Labor, as authorized representatives of the greatest humanitarian movement of the country, declare that any one who profits by the toil of children at all or by the labor of other minors required to toil more than eight hours a day, is unfair and unworthy of the patronage of true patriots and those who desire human welfare.

THEORY AND PRACTICE. Have you ever met the fellow that tells you how the organization should be run and how many members should be on our rolls and the condition the members should enjoy.

If you have not, you have missed something we assure you, for we meet them in our travels every day, and when we look up their reputation we find that as a rule he never makes any effort personally in the interest of his Local or the Brotherhood but is there with the hot air when he meets an officer or representative of the Brotherhood. Everything is theoretical with him and because the workers of our country do not follow theoretical lines, he condemns the officers for it.

A man would not have to be a student of economics to know that if every wage earners would act in unity, help each other consistently that the power of the working class will be greater than the power of the combined capitalists, but the truth of the matter is that unity of action is lacking; that the innate selfishness of man prevails in all walks of life. So long as our bread is buttered we do not place ourselves out of the way to ascertain whether our neighbor has either bread or butter. If one employer is treating his employees fairly well in a certain line of business those men do not take the interest they should in the men employed by some other employer who pays his men inadequate wages and works them an unreasonable number of hours every day. Not withstanding the lack of interest some men take in the welfare of others, these theoretical geniuses that you run up against every now and then try to show you that your officers are incompetent or are not doing their duty because they follow along practical lines and put in force practical ideas that they have learned from the hard school of experience, and blame us for one group of men's lack of interest in the welfare of some other group.

We all know that the theory of the labor movement if practiced consistently by all would be the means of bringing about ideal conditions, but the cold facts are that it is a case of every fellow for himself and the devil takes the hindmost.

Whenever you hear a fellow that is boasting about the great sacrifices he has made in the interest of humanity; what he has done for the uplift of wage earners to the detriment of his own interests, you can put it down in your note book that the movement has done a thousand times more for his benefit than he ever did or can do for the benefit of the movement.

The fellow that does things does not boast about them; he looks upon it as a duty he owes his fellowmen in payment for the benefits he has derived through his organization. He will work all day at his job and when night comes is ready to go out and do his share in the interest of his organization.

The fellow that does the boasting always finds that he has another important engagement on hand when he is called upon to perform any work in the interest of the organization, unless he is paid for it.

There may come a time when some other form of organization will prevail that will be more practical than our present one, but we do not believe, it will come in our time or in our children's time if it ever comes,
and what we should all do now is to be loyal to the organization that has been the means of creating the conditions that we now enjoy, and when we meet the fellow that has the new scheme or plan of organization, tell him to proceed with it to some unorganized field and put it into effect and to give us a practical illustration of its work, and if he does that and it is a practical plan he will not have to wait very long until we all will join forces with him, for there are none of us that will be satisfied to go along on our present plan if we are shown another plan that is more practical and beneficial to our interests.

Some say, the electrical workers should have an organization of half a million members. If every electrical worker would join our Brotherhood we could have such an organization as that, but the facts are it will take years of agitation and attention in order to bring that about.

We can all do some good for ourselves and our fellow wage earners if we will only put forth proper effort. However, that effort must be put forth along practical lines and not along theoretical lines, for the man or men that put forth their efforts today along theoretical lines are not getting results for himself or his fellow men.

The Labor Movement that has made us what we are is the movement that we should remain loyal to. Assist in our humble way when opportunity presents itself. It has been tried and found not wanting; it has its faults which can be remedied by applying the remedy on the inside. It is our duty to remain on the inside and whenever it is possible to advance our movements we should not hesitate to do so. It is good enough for over two million organized workers of our country and we should endeavor to make it attractive to the toilers who are still outside.

ORGANIZERS. Despite the fact that we have on the road at the present time twenty-two salaried officers and organizers, we are daily in receipt of applications for positions as organizers.

We stated repeatedly that it was our intention to use every available dollar for organizing purposes. We reiterate that statement now as it is our avowed intention to make good on the promises made to our membership in the past.

The unorganized fields are many. It is our intention to place organizers in them just as soon as possible, but we cannot afford to place any more organizers to work at the present time.

Just for a moment stop and consider the amount of money it takes to pay the salary and expenses of twenty-two officers and organizers. This does not include your "International President, Secretary or Treasurer," and you would no doubt be surprised to see the aggregate amount of money we pay out each month for organizing purposes.

We realize that our office would be much more popular if it were possible for us to comply with every request we receive, and commission all members as organizers that we are requested to appoint.

It should be remembered that out of the per capita received on each member per month, 15 cents is set aside in funds that cannot be used for any purpose other than the purpose for which the said funds were created. We are allowed 25 cents for the General Fund out of which we are compelled to pay the per capita tax to the American Federation of Labor, the Building Trades Department, the Railway Trades Department, the Union Label Department, the Metal Trades Department and the Canadian Trades and Labor Congress.

We are also compelled to pay the wages of our office force, the salaries of all officers and organizers and all general expenses out of that
fund so that you will readily see that we are carrying all the organizers we are able to pay out of the funds available for that purpose.

We know that the money paid out for organizing purposes is the best investment the Brotherhood can make with its money as the organizers add members to our Brotherhoods who pay their dues regularly to their respective Local Unions who in turn send their monthly per capita to this office, which eventually repays for the money expended in getting them to join.

While the amount of money paid out each month by our Brotherhood is a large one, when we consider the returns received therefrom we must all acknowledge that the money is well spent and the Brotherhood is amply repaid therefor in course of time. But bear in mind that it is many months before this repayment occurs.

We have also offered the position as organizer to two members of our Telephone Operators' Locals which will add to our expenses monthly. We are firmly convinced that this will prove a great investment. The telephone operators have made wonderful progress since organizing, and with representatives in the field exclusively in the interest of the telephone operators, we look for continued progress in organizing them and bettering their conditions.

We trust that our members throughout our jurisdiction will cooperate with our organizers when they come into their territory and help them to make their efforts successful for unless the officers and members of our Locals do assist our national officers and organizers when they are working in their territory their chances for success are very slight.

We are making wonderful progress; our membership is increasing every day despite the fact that the present year has been a poor one not alone in the electrical industry but in all industries, so we cannot help but be optimistic as to the future of our Brotherhood.

Help us to continue the good work.

LOCAL ELECTIONS

The time is nigh at hand when many Local Unions will hold election of officers, so it is time for our membership to look over the field, and select men whom they think most competent to fill the various offices. After the election it is no time to criticise a man's ability as an officer. Above all things look out for too many good fellows being placed in office, for as a rule they do not want office, and if it is forced upon them they do not attend to the business of the Union. The cold-blooded individual who never has much to say, but when he does say something it means a whole lot usually makes a good officer if you can succeed in getting him to serve. There are good men in all Local Unions, and it is the duty of the members to find them; and when they do find them to place them in the proper office. If your favorite gets defeated at election don't get sore; remember that only one can be elected to each office. Help the fellow that is elected every way that you possibly can. Make his term in office as successful as possible, and as pleasant as you can. If you have come to the conclusion after the election is over the Local Union has made a mistake, it is your duty to help all the harder. When the time comes to elect new officers then get your hammer out, and pound the one you do not like, and try and have those you do like put into office, but be sure that it is not a personal dislike you have against the officers before you start your hammer throwing. Anyone is liable to make mistakes. We should not condemn an officer for making mistakes, for it is well known by us all that a man that does not make mistakes makes very little effort to do anything of any consequence or good for himself or his fellow men. Do not allow
personalities to enter the campaign. We should bear in mind we can differ honestly in opinion with each other, but at the same time be gentlemen, and act as one brother should act towards another. Villification gets nobody anything, or anywhere, and the man that tries to vilify another unjustly is merely hurting himself, and not the subject of his attack. There should be no question raised in an election for officers based upon personal animosity, religion or nationality and when you hear one member knock another member who is a candidate for office, and you know the knocks are on account of personal feelings, vote for him, who is knocked, and you will not make a mistake; at least we have found that so in our experience.

INTERNATIONAL AGREEMENTS. We are preparing to submit to the referendum vote, agreements negotiated by representatives of our Brotherhood, and representatives of the International Association of Machinists, and representatives of the I. A. T. S. E., which are better known as the Stage Employees.

It is the duty of every member of weigh carefully both of these agreements and vote yes or no as their conscience and best judgment may dictate. Both agreements cover important questions, that have confronted our Brotherhood for years, and they require every member's special attention.

They are submitted in accordance with the action of our Chicago Convention, which decided that no officer or officers in the future could bind the Brotherhood to any agreement with any other organization covering jurisdiction of work, and decreed that all agreements in the future would have to be submitted to the referendum vote for the adoption or rejection of our membership.

Special meetings should be called to vote on these agreements, and plenty of time allowed the members for discussion, so that when the membership has decided for or against the agreements, your officers will know how to act in the premises in the future.

We want a big vote on these questions, and we trust that Local Unions will not overlook voting on them, that they will send their votes to our office in time to be counted.

SUBSCRIPTIONS. During the months of April and May several thousand of our members subscribed for The Worker, through their respective Financial Secretaries. Many of these subscriptions were not received at this office until the Financial Secretary sends in his monthly report which in many cases is quite some time after a member has paid his subscription and it often occurs that practically three or four weeks elapse after a member subscribes before we have an opportunity of entering the subscription on our books and mailing list. So we trust those who may feel that they do not receive a copy of our journal as soon after they subscribe as they think they should, will kindly understand that the delay occasioned is unavoidable. We make it a practice of sending each new subscriber a copy of the past month's issue if possible but sometimes the supply is exhausted as we only have printed each issue a sufficient number that will meet the requirements of our mailing list with an additional number to supply requests for extra copies.

We also urge all subscribers to inform us of change of address. By so doing they will be assured of receiving a copy of each month's issue promptly.
TO TRAVELING MEMBERS.

We daily receive communications for members holding traveling cards, who are in some town where there is no Local Union, requesting permission to deposit their card in the I. O.

As our laws do not permit us to transfer a member to the I. O. only when they have received a withdrawal and transfer card as is set forth in Article 15 of the Constitution, we are compelled to return the card to the member and inform him to continue his payments in the Local he is a member of.

We would therefore request that all members be guided by the clauses of our Constitution covering this matter, as it will be the means of avoiding considerable misunderstanding and inconvenience.

The past year has been the worst year in the last decade for work. Hundreds of our members all over the country have done scarcely any work. This should be a lesson to all members that in time of plenty they should save a few dollars for a rainy day, and then when depression strikes us they will be able to tide things over until work resumes its normal condition.

It would be well for our traveling members to bear in mind that it will be just as well for them to be out of work in one city as to go to another city where there is no work. They should communicate to the city they intend to work in and find out the conditions of our trade before going there.

The Press Secretaries are not responding with monthly letters sufficient to suit us. See what you can do with your Secretary about getting a letter for The Worker each month.

The Building Trades Executive Committee meets June 15th, Atlantic City, N. J. Many questions of importance to our Brotherhood will come up at that time.

We are still growing and with your assistance will so continue.

Don't allow the hot weather wilt your Trade Union spirit.

Correspondence

L. U. NO. 1, ST. LOUIS, MO.

Editor:

At the last meeting of the Fixture hangers of Local No. 1, I was instructed to write a series of letters to the Worker on the conditions existing in St. Louis in the fixture line and earnestly request that you put this one in for a starter. We desire to congratulate Sec. Ford on the new labels now furnished for use in fixtures; they are just the right size and put up in convenient form to handle properly.

The conditions of fixture work in St. Louis is far from satisfactory but are improving since we adopted the label system on all fixtures and we earnestly recommend fixture hangers in all parts of the country to adopt the label system at once. I wish to call attention to the fact that there are a number of manufacturing plants in St. Louis making fixtures for shipping business; these firms are unfair to our organization and we request all members of the Brotherhood throughout the country to refuse to handle fixtures delivered to them assembled and wired that do not bear the Brotherhood label showing that they were assembled and wired by union mechanics.

Below is a list of the most prominent shippers of such fixture goods in St. Louis:

United Electric Supply Co., 1120 Pine St., Sigoloff Bros. Hardware and Fixture Co., 814 N. Sixth St. and 1204 Franklin Ave., Standard Tool and Novelty Co., 815 N. Sixth St., Schaeffer Brass Mfg. Co., 817 Clark Ave., Missouri Lamp and Mfg. Co., 114 Elm St. and Featherstone Fixture Co., Ninth and Pine St. In addition I desire to call attention to the following names and request that if any of the men make application to one of the Brotherhood Locals that the Secretary immediately notify Local No. 1 and we will furnish information as to their conduct while in St. Louis.

Fraternally,

Jas. A. Hanlon,
Secretary Fixture Hangers of Local No. 1, St. Louis.

L. U. NO. 1, ST. LOUIS, MO.

St. Louis, Mo., is just now in the throes of a tentative proposition. A new charter has been drawn up and is to be submitted to the people. The changes are too radical to be quietly accepted by organized labor. There are too many jokers embodied and so skilfully who he is surrendering his interests to whose he is surrendering his interests to the complete control of the big lunch. They have catered to the platform of the several political parties, and so neatly are the jokers placed that who the whole charter (if carried) will be to the interest of but one class. It is evident that the employers are anxious to have it carry. They are spending money to do so. Organized labor have a few bright men that are not looking to their individual interests alone. These men are waging war as best they can. Money being scarce, they give their time and views, and are very thanklessly treated by those in their ranks. From appearance some members of No. 1 have been approached and are attempting to make the Local indorse the cinch charter. I, for one, hope it will fail. We have a charter that can be amended so as to fit the people. Therefore, let us stand by what we have that is good and eliminate the bad features. Some men are so selfish they would stoop to almost anything to accomplish their individual interests. Every movement of the employers must be carefully watched. Your enemies are after you all the time, and are using means to defeat your every movement. Therefore, think well of what you are doing and about to do before you place the big stick in their hands. You may gain today what you think a victory, but the little jokers will turn the whole thing to ignominious defeat. The same applies to the actions of some of our members as to the actions of our International officers.

You, as a body or majority portion thereof, elect them, make the law to control them, as well as yourself. They in performing their duties as laid down by your law are condemned if your personal interests are not first considered.

From my view all these questions are considered by the Employers' Associa-
tions and if they seem to in any way, be a hinderence to their control. The best place to kill the movement is in the ranks of those benefitted. Remember you are advancing, and the profit grabber sees that he is going to get less for more work when he will be forced to give you a proportionate share of what is really yours. The calamity howler is a nuisance and should be shut up. As a whole organized labor is a good thing and if some of you that are skeptical will look back, "Not so far in ancient history," it will be evident that organized labor is responsible for the better conditions prevailing. The average wage earner of today can raise a family and educate them to a standard that never was before. Not long past it was impossible for us to elect any one, but those who had the interests of the employer at heart. One evidence that will not take long to look up is the landlord and tenant law. I will not go into it, but you can find vast improvement for the protection of the tenant. Don’t jump at conclusion, but go to matters systematically.

If you will tax your brain just a little when reading some of the circulars sent broadcast over the country, you will find somethings in them that you want more definitely brought out. Another thing, if you are not acquainted with the individuals whose names appear on them, proceed to get some reliable information and a great amount of discord will be to no benefit, other than the Employers’ Associations.

Work in St. Louis is very slack, although our members are making a living and that is about all. There is nothing here that justifies inviting traveling brothers, if they expect to work. No. 1 is always glad to see the members of the I. B. E. W.

The girls must not be lost sight of. Those that are organized are happy. Their entire time is not taken up to eke out a miserable existence. They can be more independent, I ask any man. If he ever saw anything that looked better to him than a bunch of happy girls, I say, Brothers, it is up to us to do all we can to make conditions for them. So let us do our duty and I am safe in assuring you a reward from the girls.

Look well to the interests of the I. B. E. W. and keep the enemies, spies and disrupters out of our ranks.

Wishing all success, I am

Yours fraternally,

Baldy.

L. U. NO. 17, DETROIT, MICH.

Editor:

Well, Brothers, you have not heard from old No. 17 for a while now. I will try to enlighten on the reasons why. You see I have been out hunting for members who do not attend meetings, and I put in so much over time looking for something that does not exist that I have not had time to write. We have a very good attendance and have a great amount of business to transact same must be done properly, and to the satisfaction to all the Brothers, if it is not you can look for a banner crowd the next meeting night, for you see when it does not suit the boys of 17, the way the business is handled they come to meeting and do their talking, not on street corners, and booze camps. That is one reason why peace and harmony prevails in our immediate vicinity. Work in the electrical line is not rushing in this burg. While the Brothers are all working to the best of the writer’s knowledge, a few Brothers laid up through sickness and accidents. They are improving and hope to see them on the job soon.

We are still taking in new members nearly every meeting, and if the Brothers will just put their shoulders to the wheel, we can have conditions in this city, superior to any city in land, and I don’t know that we are second raters now on wages and working conditions, and hoping to keep doing better well so long, my voltage is low and amperage something terrible I must go to the ice box.

Fraternally yours,

C. E. Miller.

L. U. NO. 22, OMAHA, NEB.

Editor:

As No. 22 has not been heard from in The Worker for a long time, it falls upon me to let the Brothers know we are still on earth and getting a few new members. Things have been very slow around here for a long time and we have a large number of Brothers out of work, so would advise any one traveling to keep away from Omaha. We have been trying to get a closed shop so as to better conditions, but it looks as though we will not make it. Omaha is open shop. We believe that the Official Journal will be a good thing for the Brotherhood, if all Locals will try and get a few lines in it so that we will know how our Sister Locals are getting along. No. 22 certainly does not agree with the western Locals in regard to calling a special convention and hope that proposition will be sat down on good and hard as we have had enough of that.

Well, Brothers, as my time is limited
and I want to see this in The Worker, I will have to cut it out for this time and will try and have something of interest for the next one.

With best wishes to all the Brotherhood, I am Yours truly, J. P. Brown, Press Secretary.

L. U. NO. 41, BUFFALO, N. Y.

Editor:

I am pleased with the interest shown by the different Locals in regards to the electrical instructions taken up by the Locals. I have been an advocate of this class of instructions for the past twenty years. We have in our Brotherhood some of the brightest practical men in the business. Whom are as free with their information as the air we breathe, all for the asking so, Brothers, it is up to you to get busy when you become proficient in your calling, then you become the dictator. The system of instructions or schools used in different Locals of which I have been a member are, there is an educational or electrical committee appointed or elected, whose duty is to furnish material and instructors.

The committee will pick out different members for different evenings, giving each member picked a week or two to prepare himself upon some practical subject, he is most qualified on, having enough members in advance, so in case of an absent member you will not disappoint your class, for this class of instructions, a good sized blackboard should be used, also place in a convenient place in the room a question box where the Brothers can drop questions to be answered some time during class meetings.

For the benefit of the Locals whom have not the opportunity of this class of instructions I would suggest if the Editor does not object to establish a question and answer departments in The Worker where practical electrical subjects could be asked and answered by the members.

Fraternally yours,

Clay Weeks.

L. U. NO. 61, LOS ANGELES, CAL.

Editor:

I read with much interest in the April Worker the progress the Brotherhood is making since the Boston Convention and it is with much rejoicing to read the large list of Locals in the "get-together-spirit." I think it behooves every Local to contribute a story to our Journal, let us have the news and ideas of all our members and establish a Democratic feeling and pull for solidarity of the Electrical Workers and we will have a powerful organization.

Boston 1 A. Telephone Operators are sure a live bunch and deserve much credit for their efforts to organize the girls.

Local 61 is still continuing to take in new members, we are trying different plans to increase our membership and round up the delinquent members. We have reduced the initiation fee to $5.00 and pay a sick benefit of $7.00 per week. On June 11th, we hold another open meeting, or as some of our members put it, "an educational propaganda," in an effort to create a better feeling among our new members and organize the workers.

The Local co-operated with the Machinists in holding a protest meeting last month in the interest of Mooney, Brown and Hanlon, victims of the P. G. & E. strike who are in jail in the Northern part of the state. Something like $50.00 was raised to help defend them at a new trial.

Work for the inside men is picking up a little at this time and most of the boys who have been loafing since last winter are getting in some time. Quite a number of outside men are coming in now and are unable to "tie in with a job."

Dan W. Bechtol, of the P. D. C. was at Riverside last month in the interest of the Brotherhood. He succeeded in getting a closed shop agreement with the City Electric and Supply Co., of that city, which went in effect May 25th. This is a construction company doing work for the Southern Sierras Power Company and one job consists of building a high line 131 miles long to run from Banning to El Centro. Linemen will receive $4.25 per day and splicers $5.00. While negotiating this agreement, W. J. Kelly, with the few, showed up again on the job and was holding a meeting in another part of Riverside, still working at his old disrupted methods. Further efforts on part of some are still brewing and are trying to make trouble on this job. I might add that this will complete one of the longest power lines in the world and will be 586 miles long, from Inyo County to El Centro. There are plenty of men here to do the work.

Sorry to report the death of one of our fellow workers, Henry Jarrett, who died on the operating table before an anesthetic could be administered, May 20th.

Fred Weeks, who underwent an operation the last of May is convalescing and will be out soon. We were sorry to hear of Fred's hard luck and miss his smiling face at the meeting. He is with the Home Telephone Company.

On account of the Amalgamation,
1. O. Oslove, Foreman.
4. H. L. Averill, President.
5. Procher.
7. F. Moumine.
8. F. Shreader.
10. J. Hurst.
12. C. R. Butterfield, Shop Stewart.

Members Local No. 48, Portland, Ore., Wiring Arches on Third Street.
Local 61 will hold their first annual election, under the consolidation agreement, the last of the month. Nominations are out and many candidates are in the field and we will have a hot election.

Yours fraternally and progress,

A. E. Danielson,
Pres.-Secretary.

L. U. NO. 66, HOUSTON, TEX.

A few lines for The Worker and will start off saying that I have just finished looking over the monthly Scandalizer or The Bulletin, as they the Fitzgerald-Murphy bunch call it. I hate to take up so much space of The Worker in writing of such undesirable office-seekers and holders as they are, as they keep pouring the bull and lies in their Scandalizer every month trying to keep blind-folded their own craft, that is the I. W. W. and trying to mislead some of the unorganized and some of our members, I can not help but write letting the brotherhood know the true facts and truth of the matter. On pages 1001-1002 of their Bull monthly in April you will find where they have taken up these two pages in publishing the McNulty constitutions which was unnecessary for if the writer had only written to McNulty or Ford I am satisfied he could of gotten as many copies of the constitutions as he liked as we have no objections to any one seeing the same, but Leininger failed to find a place in our constitution whereby it says we can or may take in any body, as the Fitzgerald-McNulty bunch can do according to their own constitution, regardless of whether he be an electrical worker or not, for they have shown that to be true here in Houston for they have taken in men here that haven't done anything for the past two years but dig holes and if they stay here two years longer that's about all they will be doing. We could increase our membership in Local No. 66 if we would have taken in such men as that but we don't want that kind. They have went so far as to declare peace with Mexico, and taken Mexico in their Local. They also have a special organizer in Houston, C. A. Duck of Greenville, Texas, where there has not been a Local for the last four or five years, although he has kept one listed in their Scandalizer all the while, probably to hold his job as G. E. B. members as their membership didn't know that there were any Local in Greenville or probably did not care, as Duck being a contractor and a bill poster probably looked good enough for them.

Hoping our editor won't get angry at me for writing I will bring same to a close, but could write a great deal more and I think, although I may be wrong, but we ought to write more of this every month and put more of the facts before the members and also the public as their Scandalizer is full of bull and very rotten kind at that every month about the McNultyites which is far superior to any such a class of men as Fitzgerald-Murphy traitors.

With the best of success to our general officers and the membership as a whole, I remain,

Fraternally,

C. A. Boatman,
Press Secretary.

L. U. NO. 136, BIRMINGHAM, ALA.

Editor:
With fifty-six Locals reaffiliating since the final decision of the Supreme Court of Ohio as a guide I think, and sincerely hope the Brotherhood will soon be one big body of closer united Brothers than ever before, and our entire energy can be used to fight where we can get good results for our fighting.

I will state just here conditions in Birmingham are not any too good though I think we will come back yet. We have had a hard time for one year now and I am sure we deserve a change and, boys, I will say, don't come this way for some time, as we have men going out of town every week.

If we should ever succeed in closing up Birmingham again as it once was, I will feel that we have done alone what others have failed to do with able help on the ground at an expense to No. 136 and at the same time we feel that everything terminates well. If we had done as our enemies thought we would do and probably as many others have done, I am sure our charter would have been in Springfield instead of Birmingham. But it happened that we have got some good old Irish grit in Birmingham and we are still on the map. I am sorry to say that Bert Pinch and J. E. B. Vincent with M. N. Brown to assist is running what has been called a scab shop and I would not call it a union shop myself as they refuse to sign a contract. These three are ex-members of No. 136 and we have the same contract this year that we had last year and in fact the same contract we have had for two or three years except our wages were $4.50 up to May 1st, 1913. Since then we have a scale of $5.00, you see when a Business Agent who was in the field on a salary for one year and the President of the Local try to put us down then. It is time something was being done and I have tried hard to get an organizer here and it is impossible to get any assistance. I hope every other town in the country that is in just half such a shape as we
are can be assisted at once as I am aware of the fact that good can be done under such conditions if the right man can get on the job. Hoping success to the entire Brotherhood and an early amalgamation of the bit twisters and wire pullers of America.

Thanking the Editor for the space I am asking for in our valuable Worker, I am

Fraternally,

A. J. Taunton,

Business Agent.

L. U. NO. 297, FORT SMITH.

It has been a long time since the Brotherhood has heard from Local No. 297.

In fact I guess some of you never knew there was such a Local existing. Well we are here and intend to remain, although we haven't any conditions but will have some in the near future. The scale is 45 cents per hour. Work is very slack at present, and from all appearances will remain so. So if any brother intends coming this way I would advise him to change his trip.

The officers are as follows:

President, Sam C. Settles, 1437 May St.; Vice President, C. Oshelman, Ft. Smith Electrical Supply; Financial Secretary and Treasurer, P. M. Reeves, Box 63; Recording Secretary, J. Baumbachen, Ft. Smith Electrical Supply; Press Secretary, A. Jones.

Thanking you in advance for the space this will occupy, I remain,

Yours fraternally,

A. J.

L. U. NO. 358, PERTH AMBOY, N. J.

It is with a great effort on my part to sit down and try and write a letter for The Electrical Worker. For the past three years or so some of our members did not think it wise to have a letter in The Worker. I, at one time, about thirteen or fourteen years ago, some some letters for our valuable journal from Local No. 87, Newark, N. J., under the name of R. S. Mack, which was (R. S.) Recording Secretary (Mc), the prefix to my name. I done some good work for Local No. 87, (Linemen's Local), also for Local No. 52 of the Inside Wiremen of which our noble Grand President will remember.

I am only too glad to write a few lines to The Worker at any time but all I need is a little start.

The conditions of trade in the vicinity of this Local, Perth Amboy and parts of New Jersey in this section is not very good. It was poor all winter excepting the time of the big storm in March, which gave a lot of linemen good work.

The inside wiremen and maintenance men, except those few who had steady work in factories was slow. You could not buy a job. Your humble servant put in the worst winter he ever put in, so did some other men in the different trades in this city and vicinity.

As to our Local Union here we have a nice little Local, thirty-two strong, the members attend meetings and all are active. We have a fair treasury enough to keep things going, and take care of our sick or disabled members. We add a few lights once in a while. In the dull times we lost a few, no reason given.

We had in our midst a Reed-Murphy Local of linemen but about four to six months ago that went up in the air. They did try to hurt Local No. 358 with some inside wiremen and shelf men for a $3.00 initiation. They were going to scab it on us, and were unfair. But we said No, and stopped work for contractors that favored it, and had some of them to come over with us. They were harmless after a committee from our Local got busy.

There are only a few card linemen in this vicinity.

There are a great number of unorganized factory electrical workers in this vicinity and it would pay to get an organizer busy here and work them up. Every factory here has from one to three, some six workers in them. Non-union.

This is my limit tonight.

I will close with success to all,

Wm. H. McDonough,

Press Secretary,

Perth Amboy.

L. U. NO. 523, NORTH YAKIMA, WASH.

Editor:

As the newly elected Press Secretary, I will try to contribute a few lines to The Worker.

No. 523 has survived a rather dull winter, work has been slack for some time and the prospects for better times in the near future are not very encouraging.

Most of our members are working at present, but with some of them it is a day "now and then."

Vice President Morgan was with us a few days ago and was present at a meeting May 11th.

He assisted us in getting an agreement with the three Inside shops here.

The boys succeeded in getting closed shop, time and one-half between the hours of 5:00 p. m. and 10:00 p. m. and double time from 10:00 p. m. until relieved, from duty, double time for Sundays and holidays.

Wage scale to take effect July 1st, as follows:

Job Foreman, 56½ cents per hour;
Journeyman, 53½ cents per hour; Apprentice, 25 cents per hour, first three months.

Following nine months 30 cents, following six months 35 cents, following six months 40 cents, following six months 45 cents and thereafter 50 cents per hour until rated as Journeyman.

The members of No. 523 all seem to be satisfied with the "Tentative Agreement," as a means of bringing about a "Reunited Brotherhood" and I am sure each member of this Local will get in the game and boost for a "Greater Brotherhood." We have had enough mud-slinging and was among the electrical workers, to "hold us for awhile."

From the letters which we have received from different places in the F. D. C., there are some still sticking to the "Reid faction," but we hope they will "come across" and join the majority as affiliation means salvation for the electrical workers. Let our motto be,

Get together,
Stick together,
Fight, together, (not each other)
And win.

Wishing you success and trusting you have a little space for some "Rough neck" poetry, I remain

Fraternally,
E. J. Berrigan,
Press Secretary.

L. U. NO. 651, MEDFORD, ORE.

Medford, Ore., June 6, 1914.

Local No. 651, Medford, Oregon, formerly affiliated with the Reid organization, now affiliated with McNulty's organization and the A. F. of L., wishes to announce through your paper that this Local does not recognize any factional differences between Electrical Workers.

All Electrical Workers carrying a card, whether issued from the McNulty or Reid organization, will be shown fraternal courtesy.

We invite traveling Electrical Workers belonging to either organization to attend our meetings, which are held the first and third Saturdays.

Fraternally,
G. R. Satchwell,
Local 651.

Press Secretary.
Medford, Ore.

L. U. NO. 696, ALBANY, N. Y.

Editor:

As it has been some time since any news has been given to readers of The Worker from Local No. 696, I will try and let the good brothers know how our Local is making out in their long struggle for existence. We have just closed our thirteenth month of the strike, and what is life of our Local in the city are just as loyal today as they were one year ago. We of No. 696 have had a hard time to keep up. We have had to walk the streets and see a so-called Local bring men from out of town (professional strike breakers) to take our places and have had also to gaze on all the other trades, working on the jobs with these scabs, and even further some of our business agents were hand and glove with the men that make it a business of taking the places of union men. I was at one time under the impression that the reason that Central Bodies and other Locals were upholding the seceders, was for personal and sentimental reasons, and because they did not care to take part in our troubles, but at the present time in this city these reasons are not to be considered as all of the strike breakers here are strangers and it can not be for any reason of sentiment, the only reason that I can account for this state of affairs is a lack of union principles. It is at the present time in our city every trade for itself. Let all others do likewise. The great American Federation of Labor so far as Albany is concerned is a matter of no consideration and the natural result is that no trade is as strong as it should be. We have organized a Building Trades Council of the American Federation of Labor, but half of the building trades will not affiliate. This is not the worst of the matter. The Central Body refused by a vote to recognize the council with such a state of affairs, it is only by hard and continuous work that we have been able to keep our Local in existence, and it is not alone the above that we have to fight, but in many cases we have been compelled to fight our out of town Brothers. Many of them persist in coming into our city with out of town Contractors, and go to work without asking whether their cards will be accepted or not, as we are not able to have a business agent. Many of the above cases are taking place for some time before we get wise to it. It seems very strange to me how many Brothers do not know that they are violating the constitution when they go to work without seeing that their card is accepted, and in all cases this is the excuse that has been given. We hope that many Brothers will not come to our city until we have the strike breakers routed, and when our conditions are once more ideal, we will not refuse to accept any cards. The cost to our Local since the strike started has been very heavy, we had over one thousand dollars in our treasury besides we gave a ball and cleared about $200.00 and carried on a business by the Local
in which some money was made, also a strike assessment of $1.00 per week from each man working. All told it foots up to about four thousand dollars and now our money is all spent, but spent in a good cause and I can say that there is not a single man in the Local that would not do it all over again, if called upon. We of Local No. 696 feel that no labor body has done more than we have during the past year to uphold our Brotherhood it is true we have lost many members, but we can point with pride that we have lost them by their taking paid up cards and looking elsewhere for work, only four have left us to scab it, and to them we say "Goodbye."

Our Local owes many thanks to good and loyal Schenectady. It has been through the true unionism of that city that has given us many opportunities to keep our men employed. They forced one of the Contractors to employ our men in our city, also forced a large firm to take its work from a non-union Contractor and employ our men, and at present we are affiliated in their District Council as also are Troy and Amsterdam, and we believe that through this affiliation in the near future we will be able to drive out of our city the strike breakers or get them to see the light of day and get where they belong and leave the remnants of the secession movement, and affiliate with the Brotherhood. Many being down and out, to this I can say reports have gone out about our Local that we are a very lively down and outer, although a small Local to what we were, we are still on the map of the Brotherhood and intend to remain, as we have made a fight for better conditions in our city for The Electrical Worker, and are still as determined as when we started, so when Brothers are on the tramp looking for work. Please side step Albany. Fraternally,

J. J. Dowling,
Financial Secretary, L. U. No. 696.

To the Officers and Members:

Greeting—Attended meeting of L. U. No. 696 of Albany and went over present conditions there to see what could be done. After three days we held an unofficial conference between Committee of Both Sides, I had to leave and since Organizer Wm. Godshall is on the scene.

Left for Boston to meet the International President and the Presidents of all the Telephone Operators' Unions in New England in reference to organizing and female organizers. The present plan of organizing was endorsed.

Left for Worcester finished up the books and standing of the members of L. U. No. 5A and attended there regular meeting. While in town, I addressed the mass meeting of the Building Trades forwarded movement and assisted for a few days in same. I attended the regular meeting of L. U. No. 7A of South Framingham. Went to Boston, attended to the several meetings of the railroad department and formation of Federation on the New Haven, Boston and Maine Railroads. I addressed the open meeting of Local Union No. 2A of Lynn and we received several applications as well as new members. I also attended to the meeting of the General Organizing Committee of the General Electric Works address an open meeting of L. U. No. 96 of Worcester. Attended regular meeting of L. U. No. 5A and open meeting of Telephone Employees under the auspices of L. U. Nos. 5A and 616 of Worcester. Came to Springfield and went over and straightened out grievances of L. U. No. 7 and visited Westfield with their Business Agent. This is about all with the exception of getting several departments of the Telephone Employees together which I expect to be able to install into Locals in about a week. I will also see if it is possible to place Locals in the Lynn G. E. during the coming month.

With best wishes, I remain,
Fraternally yours,

G. M. Bugniazet,
International Vice President.
William Moriarty, a lineman, 30 years old, of Schenectady, N. Y., was awarded a verdict for the sum of $18,000 by a jury in the Supreme Court, held in the City of Schenectady, N. Y., and is the largest verdict in the history of Schenectady county, Justice Henry M. Kellogg presiding, June 2, 1914.

Miller and Golden of Schenectady representing the Illuminating Co. and Thomas J. O'Neill of 309 Broadway, New York City, representing Moriarty, who was injured September 26, 1913, while in the employ of the Schenectady Illuminating Co., as a lineman under the direction of Foreman Jeremiah Sweeney. Moriarty was directed to strip an old pole and with other workmen transfer the wires to a new pole about fifteen feet higher than the old pole. Some time before the accident the old pole was lashed to the new pole and as the lashing interfered with the removing of the cross arm, Sweeney directed Moriarty to remove the lashing. Shortly thereafter the pole fell. As Moriarty was lashed to the old pole he had no chance of getting clear and the pole fell across his abdomen, fracturing his pelvis and left leg. Both his hips were dislocated and he was otherwise seriously injured. The plaintiff told Edward Perry, who testified that he heard Foreman Sweeney direct Moriarty to remove the lashing, and at the time he heard Moriarty tell Sweeney that the pole was shakey, nevertheless Sweeney assured Moriarty of his safety and he continued to work.

The company called as its witnesses, Foreman Sweeney and Groundman McCafferty. Sweeney testified that he did not have an iron bar or any other proper appliances to test the pole and that Moriarty neglected to make use of such.

A section of the rotted pole was put in as an exhibit before the jury, which showed that from the center of the pole to within one-fourth inch of the outer surface of the pole it was nothing but dry rot. The company maintained their inspection system and relied upon each workman before he climbed upon the pole to inspect it.

The court then directed that Sweeney leave the witness stand and never let such a thing occur again. Sweeney had no more than left the court house when the superintendent, VanDyke representing the illuminating Company caught Sweeney and put him into an auto and hurried off to the company's office and upon entering Sweeney was informed of his discharge, because he had testified against the company.

The following morning Groundman McCafferty was likewise discharged for the reason that McCafferty testified, he could not remember if there was an iron bar in the wagon: It is quite evident that the company were trying to force McCafferty to testify that they had provided proper appliances to test the pole and that Moriarty neglected to make use of such.

We presume that if the pole had injured a citizen instead of Moriarty the company would have shown a most excessive. Moriarty was represented by Thomas J. O'Neill, an attorney at 309 Broadway, New York City. For the last year and a half Mr. O'Neill has repre-
Elementary Lessons in Electricity and Magnetism

LESSON XXI.—Electrometers.

259. In Lesson II, we described a number of electromscopes or instruments for indicating the presence and sign of a charge of electricity; some of these also served to indicate roughly the amount of these charges, but none of them save the torsion balance could be regarded as affording an accurate means of measuring either the quantity or the potential of a given charge. An instrument for measuring differences of electrostatic potential is termed an Electrometer. Such instruments can also be used to measure electric quantity indirectly, for the quantity of a charge can be ascertained by measuring the potential to which it can raise a conductor of known capacity. The earliest electrometers attempted to measure the quantities directly. Lane and Snow Harris constructed "Unit Jars" or small Leyden jars, which, when it was desired to measure out a certain quantity of electricity, were charged and discharged a certain number of times. The discharging gold-leaf electroscope of Gaugain was invented with a similar idea.

260. Repulsion Electrometers. — The torsion balance, described in Art. 15, measures quantities by measuring the forces exerted by the charges given to the fixed and movable balls. It can only be applied to the measurement of repelling forces, for the equilibrium is unstable in the case of a force of attraction.

There are, besides the gold-leaf electroscope and the Lane's electroscope, described in Lesson II, a number of finer electrometers based upon the principle of repulsion, some of which resemble the torsion balance in having a movable arm turning about a central axis. Amongst these are the electrometers of Dellmann and of Peltier; the latter of these is shown in Fig. 111, in the Lesson on Atmospheric Electricity. In this apparatus a light arm of aluminium, balanced upon a point, carries also a small magnet to direct it in the magnetic meridian. A fixed arm, in metallic contact with the movable one, also lies in the magnetic meridian. A charge imparted to this instrument produces a repulsion between the fixed and movable arms, causing an angular deviation. Here, however, the force is measured not by being pitted against the torsion of an elastic fibre, or against gravitation, but against the directive magnetic force of the earth acting on the small needle. Now this depends on the intensity of the horizontal component of the earth's magnetism at the place, on the magnetic moment of the needle, and on the sine of the angle of its deviation. Moreover, the repulsion here is not between two charges collected on small spheres, but between the fixed arm and the movable one. Hence, to obtain quantitative values for the electrometer, it is necessary to make preliminary experiments and to "calibrate" the degree-readings of the angular deviation to an exact scale.

261. Attracted-Disc Electrometers.— Snow Harris was the first to construct an electrometer for measuring the attraction between an electrified and a non-electrified disc; and the instrument he devised may be roughly described as a balance for weighing a charge of electricity. More accurately speaking, it was an instrument resembling a balance in form, carrying at one end a light scale pan; at the other a disc was hung above a fixed insulated disc, to which the charge to be measured was imparted. The disadvantages of this instrument were manifold, the chief objection being due to the irregular distribution of the charge on the disc. The force exerted by an electrified point falls off inversely as the square of the distance, since the lines of force emanate in radial lines. But in the case of a uniformly electrified plane surface, the lines of force are normal to the surface, and parallel to one another; and the force is independent of the distance. The distribution over a small sphere nearly fulfils the first of these conditions. The distribution over a flat disc would nearly fulfill the latter condition, were it not for the perturbing effect of the edges of the disc where the surface-density is much greater (see Art. 35); for this reason Snow Harris' electrometer was very imperfect.

Sir W. Thomson has introduced several very important modifications into the construction of attracted-disc electrometers, the chief of these being the employment of the "guard-plate" and the providing of means for working with a definite standard of potential. It would be beyond the scope of these lessons to give a complete description of all the various forms of attracted-disc electrometer; but the main principles of them all can be readily explained. 

The disc C, whose attraction is to be measured, is suspended (Fig. 100) with—

Kindly allow space for the above in the next issue,

Yours sincere Brother,

John J. Breen,
Local No. 20.
in a fixed guard-plate, B, which sur-

rounds it without touching it, and which is placed in metallic contact with it by a fine wire. A lever, L, supports the disc, and is furnished with a counterpoise; whilst the aluminium wire serves as a fulcrum may be also employed to produce a torsion force. In order to know whether the disc is precisely level with the lower surface of the guard-plate a little gauge or index is fixed above, and provided with a lens, l, to observe its indications. Beneath the disc and guard-plate is a second disc, A, supported on an insulating stand. This lower disc can be raised or lowered at will by a fine wire. A lever, L, supports the disc, and is furnished as a fulcrum.

From this we gather that, if the force F remain the same throughout the experiments, the difference of potentials between the discs will be simply proportional to the distance between them when the disc is in level equilibrium.

From this we gather that, if the force F remain the same throughout the experiments, the difference of potentials between the discs will be simply proportional to the distance between them when the disc is in level equilibrium.

The quantity \( \sqrt{\frac{8\pi F}{S}} \) may be determined once for all as a "constant" of the instrument.

The condenser is provided in these instruments with a gauge, itself a attracted-disc, to indicate when it is charged to the right potential, and with a replenisher to increase or decrease the charge, the replenisher being a little convection-induction machine (see Art. 45).

262. The Quadrant Electrometer.—The Quadrant Electrometer of Sir W. Thomson is an example of a different class of electrometers, in which use is made of an auxiliary charge of electricity previously imparted to the needle of the instrument. The needle, which consists of a thin flat piece of metal hung horizontally by a fine or thin wire, thus charged with, say, + electricity, will be attracted by a — charge, but repelled by a + charge; and such attraction or repulsion will be stronger in proportion to these charges, and in proportion to the charge on the needle. Four quadrant pieces of brass are fixed horizontally below the needle without touching it or one another. Opposite quadrants are joined with fine wires.
Fig. 101 shows a very simple form of the Quadrant Electrometer, as arranged for qualitative experiments. The four quadrants are enclosed within a glass case, and the needle, which carries a light mirror, M, below it, is suspended from a torsion head, C, by a very thin metallic wire, F. It is electrified to a certain potential by being connected through a wire attached to C, with a charged Leyden jar or other condenser. In order to observe the minutest motions of the needle, a reading-telescope and scale are so placed that the observer looking through the telescope sees an image of the zero of the scale reflected in the little mirror. The wires connecting quadrants 1 and 3, 2 and 4, are seen above the top of the case. The needle and quadrants are shown in plan separately above. If there is the slightest difference of potential between the pairs of quadrants, the needle, which is held in its zero position by the elasticity of the wire, will turn, and so indicate the difference of potential. When these deflections are small, the scale readings will be very nearly proportional to the difference of potential. The instrument is sufficiently delicate to show a difference of potential between the quadrants as small as the 1/50 of that of the Daniell's cell.

For very exact measurements many additional refinements are introduced into the instrument. Two sets of quadrants are employed, an upper and a lower, having the needle between them. The torsion wire is replaced by a delicate bifilar suspension (Art. 118). To keep up the charge of the Leyden jar a "Replenish" is added; and an "attracted-disc," like that of the Absolute Electrometer, is employed in order to act as a gauge to indicate when the jar is charged to the right potential. In these forms the jar consists of a glass vessel placed below the quadrants, coated externally with strips of tinfoil, and containing strong sulphuric acid which serves the double function of keeping the apparatus dry by absorbing the moisture and of acting as an internal coating for the jar. It is also more usual to throw a spot of light from a lamp upon a scale by means of the little mirror (as described in the case of the Mirror Galvanometer, in Art. 202), than to adopt the subjective method with the telescope, which only one person at a time can use. When the instrument is provided with replenisher and gauge, the measurements can be made in terms of absolute units, provided the "constant" of the particular instrument (depending on the suspension of the needle, size and position of needle and quadrants, potential of the gauge, etc.) is once ascertained.

263. An example will illustrate the mode of using the instrument. It is known that when the two ends of a thin wire are kept at two different potentials a current flows through the wire, and that if the potential is measured at different points along the wire, it is found to fall off in a perfectly uniform manner from the end that is at a high potential down to that at the low potential. At a point one quarter along the potential will have fallen off one quarter of the whole difference. This could be proved by joining the two ends of the wire through which the current was flowing to the terminals of the Quadrant Electrometer, when one pair of quadrants would be at the high potential and the other at the low potential. The needle would turn and indicate a certain deflection. Now, disconnect one of the pairs of quadrants from the low potential end of the wire, and place them in communication with a point one quarter along the wire from the high potential end. The needle will at once indicate that the difference of potential is but one quarter of what is was before.

Often the Quadrant Electrometer is employed simply as a very delicate electroscope in systems of measurement in which a difference of electric potential is measured by being balanced against an equal and opposite difference of potential, exact balance being indicated by there being no deflection of the Electrometer needle. Such methods of experimenting are known as "Null Methods," or "Zero Methods."

264. Dry-Pile Electrometer.—The principle of symmetry observed in the Quadrant Electrometer was previously employed in the Electroscope of Bohnenberger—a much less accurate instrument—in which the charge to be examined was imparted to a single gold leaf, placed symmetrically between the poles of a dry-pile (Art. 182), toward one or other pole of which the leaf was attracted. Fechner modified the instrument by connecting the + pole of the dry-pile with a gold leaf hanging between two metal disks, from the more + of which it was repelled. The inconstancy of dry-piles as sources of electrification led Hankel to substitute a battery of a very large number of small Daniell's cells.

265. Capillary Electrometers. — The Capillary Electrometer of Lippmann, as modified by Dewar, was described in Art. 225.
Local Union Directory

This Directory is compiled from the quarterly reports furnished by local secretaries. If your report is not properly classified, it is because no report has been furnished. Local secretaries should promptly report any changes.

Locals are composed of branches of the trade, as per the following signs:

(a) Mixed.  (f) Cable Splicers.
(b) Linemen.  (g) Switch-board Men.
(c) Inside.  (h) Shopmen.
(d) Trimmers.  (i) Fixture Hangers.
(e) Cranemen.  (j) Telephone Operators.

(c) No. 1, St. Louis, Mo.—Meets every Tuesday night at 28th and Washington Ave., at Tuscan Hall. President, J. E. Osborn, 515 Lafayette Ave.; Vice President, E. S. Wood, 4447 W. Belle Place; Financial Secretary, W. B. Smith, 4339 Itasca St.; Recording Secretary, L. C. Klinger, 114 W. 14th St.; Treasurer, G. M. Ravoux, 1434 Arlington Ave. E. B. meets every Friday.

(c) No. 5, Pittsburgh, Pa.—Meets every Friday night at McGeagh Bldg., 607 Webster Ave.; President, S. D. Young, 807 McGeagh Bldg.; Vice President, R. G. Alexander, 200 Guerrero St.; Financial Secretary, E. P. McDougal, 178 Kenedour Ave.; Crafton, Pa.; Recording Secretary, Morgan Emanuel, 807 McGeagh Bldg.; Treasurer, F. J. Wynn, 807 McGeagh Bldg.

(c) No. 6, San Francisco, Cal.—Meets Wednesday at Building Trades Temple, 200 Guerrero St. President, W. H. Urny, 200 Guerrero St.; Vice President, R. G. Alexander, 200 Guerrero St.; Financial Secretary, P. A. Clifford, 200 Guerrero St.; Recording Secretary, E. V. McKenzie, 200 Guerrero St.; Treasurer, G. M. Fisk, 2417 Polk St.

(c) No. 7, Springfield, Mass.—Meets every Monday night at N. A. S. E. Hall, 373½ Main St.; President, F. Kavanagh, 221 Summer St.; Vice President, D. A. Moore, 4 Eagle St.; Financial Secretary, J. A. Beaulacich, 81 Pynchon St.; Recording Secretary, Fred M. Miller, 216 N. Main St.; Treasurer, Groop Ross, 408 N. Main St.

(c) No. 8, Toledo, Ohio.—Meets every Monday at Swiss Hall, Monroe St. President, T. Crahan, 670 Fernwood Ave.; Vice President, G. Struh, 446 Georgia Ave.; Financial Secretary, Roht. Hammer, 125 Canal Ave.; Recording Secretary, George Hammer, 407 Austin St.; Treasurer, Joe Christ, 905 Bricker Ave.

(a) No. 9, Chicago, Ill.—Meets every Friday at 70th and State St. President, R. A. Brebman, 2935 Harvard St.; Vice President, B. H. Patwell, 7022 Winchester Ave.; Financial Secretary, I. M. Lee, 2203 W. Monroe St.; Recording Secretary, A. M. Parish, 1946 N. Leclaire Ave.; J. T. Kennedy, 136 Mayfield Ave.

(c) No. 12, Pueblo, Colo.—Meets Friday at Engineers' Hall, Room 21–22, Pope Block. President, W. L. Nelson, 1026 E. 27th St.; Vice President, E. W. Price, Box 70; Financial Secretary, R. W. 14th St.; Recording Secretary, R. J. Moose, Box 70; Treasurer, J. F. Campbell, 191 Central Main St.; Press Secretary, L. C. Klinger.

(b) No. 17, Detroit, Mich.—Meets every Monday night at St. Aloysius School, Park St. President, Edward J. Fitzthomas, 45 Cherry St.; Vice President, Franklin Wynn, 807 McGeagh TIldg.; Financial Secretary, H. P. Robinson, 624 Antoinette St.; Recording Secretary, II. L. Hunt, 316 Bulh Bldg.; Treasurer, Jack Packard, 367 High W.
